

Laser Use in Canada and the importance of Laser Training Certification;

A recent survey conducted on Corrective Laser Treatments performed by dermatologists in Canada to repair patient injuries as a result of laser treatments enforces the necessity of professional Laser Training Certification Courses.

The survey results show that 73% of dermatologists in Canada have treated patients for burns, scars or other wounds sustained after seeking laser hair removal, IPL or other laser treatments offered by improperly trained, uncertified salon technicians or other non-physicians.

The Canadian Dermatology Association feels strongly that the use of lasers in cosmetic procedures be restricted to Certified Personnel and Physicians only.

The CCALT courses offered at EIE MediSpa & Laser Training Centre provides a greater understanding of the skin, its structure and the implications of laser on the skin. Our students receive information about medical terminology, skin diseases important to be recognized in respect of laser treatments, cleaning and disinfecting the laser room and the equipment. Our students are trained to choose the correct laser parameters according with the client skin type and medical history. They are trained not only to perform efficient and safe laser procedures, our students are also fully trained how to deal with treatment related side effects.

EIE MediSpa & Laser Training Centres in depth 6 week Certified Clinical Laser Technician program meets the requirements outlined by the CDA (Canadian Dermatology Association) to ensure the safety of cosmetic laser treatments.

Other benefits to consider are;

- Small Class sizes (max 6) for optimal learning
- State of the Art Facility & Equipment
- Renowned Instructors
- Outstanding Track Record
- Award Winning Graduates

Consider the Advantages of the Medical Esthetics Industry

- High earning potential!
- An exploding marketplace—Non-surgical cosmetic procedures have increased over 700% since 1997!
- Satisfied customers because they look and feel their best!
- Always new technologies to use!

Individuals who seek Esthetic Laser training include:

- Cosmetologists
- Estheticians
- Makeup Artists
- Skin Care Specialists
- Nurses
- Anyone seeking an exciting and rewarding career change
